Profile

Passionate Computer Science Problem Solver with 8+ years of experience in building multiple highly engaging B2C products scaled to 5M+ users.

Areas: Architecture, Complex Problem Solving, Building Team

Employment History

CTO & Co-founder, Khabri Audio Pvt Ltd, Gurgaon

AUGUST 2017 – PRESENT

Built India's fastest-growing audio platform enabling individuals to share and connect with the content they value from scratch. Launched 6 products including 3 apps & 3 websites handling 30+ team members. Scaled up to multi-million highly engaging users delivering smooth experiences with an average response of 14 ms on the Home Page and maintaining 99.8% crash-free sessions. Major functions included Live Interactions, Streaming, Recording, Search, Content Recommendation, Payments, and Analytics. Migration within a month duration from AWS to Azure. Built a recommendation engine and dynamic ranking search engine along with analytics & monitoring. Raised 3.1 Million dollars from Investors like Pioneer, Founders Fund, Rebel Fund, Titan Capital, GSF & Y Combinator

Technology Used: Java, Python, Node, AWS, GCP, Azure, Bigquery, Elasticsearch, Queue Services, Docker, Kubernetes, Android, Kotlin, React, Next JS, MySQL, MongoDB, Redis, CDN

Senior Software Engineer, OnlineTyari, Gurgaon

NOVEMBER 2015 – AUGUST 2017

Building an online learning platform for the millions of people who aspire to bag a government job. Built products at scale leveraging the power of technology. Built their recommendation engine, data processing pipelines, back-end services,

Technology used: Java, Python, Elasticsearch, Kafka, Spark, Redis

Associate Software Engineer, Nucleus Software Pvt Ltd, Noida

AUGUST 2014 – OCTOBER 2015

Worked with R&D Mobility team as Software Engineer, delivered back-end services in very strict timelines where I realized my true potential in solving technical problems and handling challenges.
